

Please amend claim 5 to read:

5. (Amended) The system of claim 4 further including:
a plurality of speech terms used in connection with
specific actions of the system, and
wherein said means for providing said associated set of
speech terms include:
a stored relevance table of universal speech input
commands and universal computer operation terms
conventionally associated with actions initiated by said
input commands, and
means for relating [the particular interactive
interface terms] said plurality of speech terms used in
connection with specific actions of said system with [terms]
commands in said relevance table.

Please amend claim 10 to read:

10. (Amended) The method of claim 9 further including the
step of:
providing a plurality of speech terms used in
connection with specific actions of the system, and
wherein said step of providing said associated set of
speech terms includes:
storing a relevance table of universal speech input
commands and universal computer operations terms
conventionally associated with actions initiated by said
input commands, and
relating [the particular interactive interface terms]
said plurality of speech terms used in connection with
specific actions of said system with [terms] commands in
said relevance table.

Please amend claim 15 to read:

15. (Amended) The computer program of claim 14 further including:

a plurality of speech terms used in connection with specific actions of the system, and

wherein said means for providing said associated set of speech terms include:

a stored relevance table of universal speech input commands and universal computer operation terms conventionally associated with actions initiated by said input commands, and

means for relating [the particular interactive interface terms] said plurality of speech terms used in connection with specific actions of said system with [terms] commands in said relevance table.

REMARKS

The Abstract has been rewritten in order to conform to the requirements set forth in the Office Action.

Claims 5, 10, and 15 have been amended to satisfy the objections of the Examiner. The Examiner appropriately objected to the phrase, "the particular interactive interface terms" in that the phrase did not have an accurate antecedent. In order to cure this defect, the term now has been set forth positively in each of the three claims as "a plurality of speech terms used in connection with specific actions of the system", and then subsequently referred to. The basis for the description of this claim element may be found in the specification at page 9, line 19 through page 10 line 33.

The claims have been provisionally rejected based on double patenting with respect to claims 1-15 of copending
